

Campaign Update #44: Over \$41.5 Million Raised & Construction Continues!

We are excited to announce that we have surpassed the \$41.5 million mark in our campaign! That means we have less than \$5 million to go in the next few months to reach our goal of \$46.5 million.

Now is the time to COMPLETE THE PROMISE! Please pray about how you can be involved in this once-in-a-lifetime campaign for the future of our schools.

The impressive front entrance of the new Academic Center is taking shape.

Here's a look at the main Academic Center entrance from the inside, which will feature two levels and beautiful open spaces for students.

The image below is an architectural rendering of the new Academic Center.

This photo shows the current status of our new top-loading gym.

The new gym will look something like the illustration below. (If you look back at the construction photo above, you'll see where the entrances are, where you will walk down into the bleachers!)

Inside the Academic Center, you can start to see where the science classrooms will be located.

An architectural rendering shows what the breakout area might look like outside the Science wing.

Our four main areas will connect together with a unique walkway. Here's a look at that area between the Athletic and the Academic Centers.

This photo looks the other way - from the Academic Center to the Athletic Center. The peak on the right side of this photo is the main entrance to the Athletic Center.

If you drive up 9th Street, you will see the great progress on the addition at St. Mary's Grade School. We look forward to this additional space, which will add five early childhood classrooms, a library and a music room.

The architectural rendering of the new St. Mary's Grade School addition is shown below.
