

CATHOLIC EDUCATION

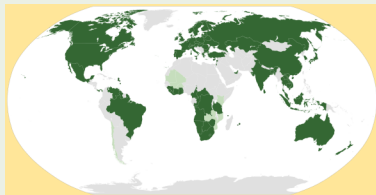

The Good News from Our Kingdom

Junior High Science Fair

Science is a multi-faceted, evidence-based and ever-changing field. To better understand the investigative process that is at the foundation of scientific knowledge and understanding, our junior high students participate in an annual science fair. Under the direction of our science teacher, Ms. Kerr, students learn the scientific inquiry process which consists of asking questions, conducting investigations, tracking and analyzing data, and forming conclusions that may lead to new solutions or discoveries.

Junior High Geography Bee

To understand the geography of past times and how it has played important roles in the evolution of people, their ideas, places, and environment, 6th-8th grade students learn about the geography of the world and the great events that have taken place.

Our annual Geography Bee was held the second week in January. Sponsored by Mr. Edwards, our junior high history teacher, five classes competed in this event, resulting in the following winners: V. Burns (6W), J. Thomas (7B), J. Martinez (7M), G. Gregory (8E), and J. Davis (8G). Winners will compete for the chance to represent our school at the state Geography Bee. Congratulations students!

**SAVE THE DATE
(ALL ARE WELCOME)**
