Did You Know? Internet Safety for Kids: The Internet has become the new schoolyard for child molesters seeking girls or boys to victimize. Internet "chat rooms" provide a teenager with an opportunity to engage in a "live" conversation with friends from school or church, or with other teenagers from around the world. A chat room is similar to an old-style telephone party line, except that the teens are typing. Law enforcement has found that child molesters use chat rooms to gain easy and safe access to teens. Because of the seemingly caring and seductive talent of child molesters, teenagers should be warned that when they are in a chat room, they should never provide anyone with private information, personal information, and especially their specific physical location.
