

Promise

Children in poor urban settings are like trees growing in compacted soil.

San Juan Diego Academy helps students grow by enriching their environment:

Smaller school
Higher expectations
Daily affirmations

College-going culture
High quality instruction
Targeted intervention

Shared beliefs
Success orientation

There's just no comparison...

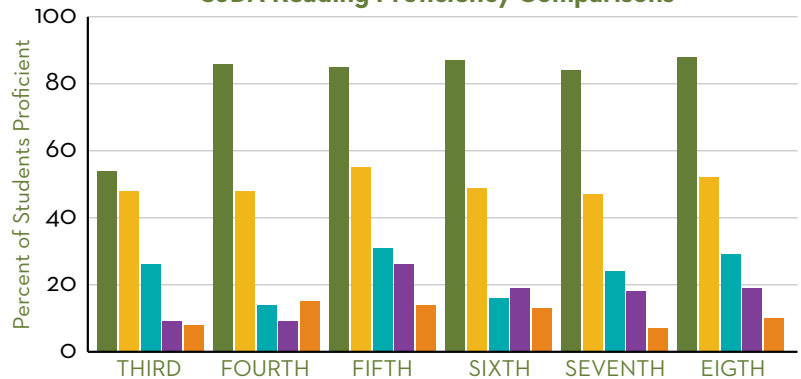

San Juan Diego Academy students out-perform their public and charter school counterparts on standardized achievement tests. Each year, in every grade, SJDA scores climb toward the 100 percent proficiency mark. Without SJDA as a viable choice, our children would, most likely, be attending one of these local public or charter schools.

A cost-effective solution...

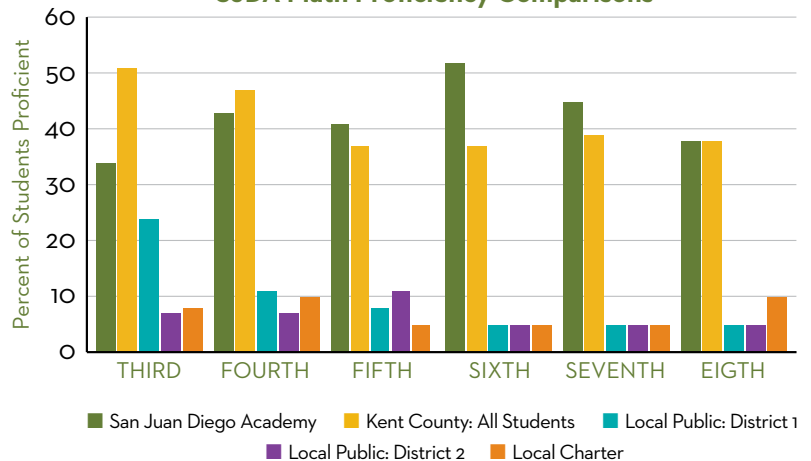

San Juan Diego Academy manages to a per pupil cost of \$5,500 compared to \$8,013 at Michigan charter and public schools, making SJDA not only a top performer but a cost-effective solution to the state's growing education gap.

**Per pupil costs according to the State School Aid Update, Michigan Department of Education, February 2018.*
