‘Supportive Classes’

Mermier Ashraya is committed to the education of the children, youth and grown up ones. Our focus is to create a culture of learning – formal as well informal learning of academic studies, life skills and good manners. Our constant efforts with your assistance have brought tremendous progress in the lives of the tribals who were harassed and helpless.

One of the means to create the culture of learning is that to create an interest for learning at an early stage of one’s childhood. An another aspect is to accompany the students in a friendly manner. Mermier Ashraya has made progress in winning the heart of the tiny ones from the neighboring villages.

We have around 100 school going children and 10 volunteers to assist in educating these young ones.
