

Saint Ann School

Where Faith & Knowledge Meet

Dear Saint Ann School Families,

Again this year, we will be offering the Math summer review books to help your child maintain and improve their math skills over the summer. The company also offers a Language summer review book that provides practice in comprehension, grammar, vocabulary, and decoding skills. The books are available for all grade levels from Pre-Kindergarten through Grade 8, as well as Pre-Algebra and Algebra. You can view these materials online at www.summerskills.com

These workbooks are designed to be used 3 days per week for 15 to 30 minutes per day over the 10-week summer vacation. Each workbook contains a glossary of important terms as well as the formulas necessary to complete the problems. An answer key (which shows how each problem is solved) is also included so students can readily identify their mistakes.

Students in the Advanced Math Program will have a mandatory summer assignment in the appropriate workbook. The cost of the workbooks is \$19.00 which includes shipment to the school. Checks may be made payable to Saint Ann School. Please include your child's name on check if the last name is different. Your child's workbook will be delivered directly to their classroom before the end of the year.

It is strongly recommended that students in on level math classes 4th through 7th grade also order the math workbook in preparation for the new math program that will be initiated in September.

Please complete the order form below and return by **Friday May 17, 2019**. When ordering please indicate your child's current grade as these books are designed to sharpen the skills taught this year.

Please contact Mrs. Catherine Smith at csmith@st-ann-school.org with any questions.

Sincerely,

Salvatore Chiaravalloti
Principal
