

Busy, fun and exciting summer planned for your child in Eagle Club!

I have been busy planning for our Eagle Club Summer Program with so many awesome field trips and lots of exciting adventures and activities! I believe children love having experiences that they can share with each other as they learn and grow socially, emotionally, mentally and spiritually being with friends - and I think it's really important when they do :)

Here are a few things planned so far:

We are planning on growing our own vegetables in our garden outside Eagle Club to maintain and harvest, we will have science activities that will make your kids wonder...hmmm....we will play outside EVERY SINGLE DAY! We will swim, nature hike, find toads on the playground, go to museums, make so many art projects it may blow your mind! We will bounce on trampolines, play ball, go to the zoo, take some tours ~ heck, kids may even come home a little dirty!

We are going to be so busy having fun that your kids will completely forget they are learning!

I am really looking forward to a summer with loads of fun, friendship and fabulousness! Please let me know if you have any questions I can answer for you!
