### Explanatory Notes

Tests shown in gray are excluded from summary statistics. Either the test occurred outside the testing window for a term, had an invalid score, or was a repeat test for a student within a term.

Test Invalidation Reasons: \*\*\*1 The test duration was too short to provide a valid result. \*\*\*2 The overall RIT score for this test is above the valid range. \*\*\*3 The overall RIT score for this test is below the valid range.

\*\*\*4 The standard error for this test is below acceptable limits. \*\*\*5 The standard error for this test is above acceptable limits. \*\*\*6 The test has been identified as invalid. \*\*\*7 High level of rapid guessing has invalidated test.

Due to statistical unreliability, summary data for groups of less than 10 are not shown.

\* This data is not available for reporting. Please refer to help and documentation for more information.
