

SUBJECT AREAS

Catechetics/Religious Education

The Catholic Church recognizes parents/guardians as the primary educators of their children. The role of the parish school is to supplement and complement the role of the parent. In the school, a formal catechetical program is taught daily. The Diocesan Catechetical Curriculum Guidelines, "Growing in God's Covenant" contain a balance of doctrinal content, scriptural understanding, faith formation, prayer and worship experiences.

Goals and objectives are constant and consistent to enhance the spiritual formation and moral development of all students. A genuine, personal relationship with God and the response of worship and service are ultimate goals of the religious instruction. Liturgical and personal prayer are outcomes of the guidance and religious instruction provided. Opportunities for both communal and personal prayer are a daily priority. Careful planning and programming ensure a broad and deep understanding of authentic Church Doctrine. A variety of materials and resources are used to foster both spiritual growth and moral development.

Parents are encouraged to communicate in words and actions the Church's teaching concerning human sexuality. When adults respond to their sexuality in a love-giving manner they enable their children to integrate the Church's teaching concerning human sexuality into their own lives. The Catholic Vision of Love is the Diocesan mandated Sexuality Program.

Language Arts

The language arts curriculum presents numerous opportunities for the integration of faith, culture and life by developing an awareness of the Gospel values. The philosophy inherent in the language arts curriculum is one of continuous growth, which recognizes and nurtures the God-given potential and learning style of the individual.

Language, as communication, enables one to become more perceptive through listening, observing and feeling. Language, as a skill, provides one with the important tools to speak fluently, to read and comprehend, to compose, to write legibly and to spell correctly. An awareness of the history of language and the continuous development of vocabulary also are important phases of skill development. An appreciation of literature enriches the student through the experience of skillful authors who vicariously open new worlds to the student.

Mathematics

It is our mission to enable all students to learn the skills, acquire the knowledge, and develop the attitudes in mathematics necessary for them to become morally and socially responsible citizens. The challenge is not only to meet and to exceed grade level expectations but to excite students to explore topics on their own, to develop proof for answers and to learn from one another.

Social Studies

In the Catholic School, Social Studies provides many opportunities for teachers to help students understand, appreciate, and learn how to live Christian social values.

The scope of the social studies curriculum includes elements of anthropology, economics, geography, history, political science, and sociology, with emphasis on global awareness and values. An integrated interdisciplinary approach helps students develop a sense of relationship among the various social studies disciplines. A clear understanding of current events helps students to integrate the past with the present and prepares them for the future.

The Social Studies curriculum begins in kindergarten with an introduction to community helpers. It progresses in the primary grades to the study of family and friends, and later encompasses a more in-depth study of the community. Beginning in fourth grade, the curriculum focuses on the study of the United States land regions and Pennsylvania history. At the fifth grade level, both United States history through the Civil War and a study of the United States geographical regions are studied. Sixth grade students study World Cultures and World Geography with an emphasis on the countries of the Eastern Hemisphere. Seventh grade studies United States history to the Reconstruction and eighth grade studies United States history beginning with the Reconstruction to the modern day. Map and geography skills are taught at all levels.

Science

The primary goals of the teaching of science in the Catholic schools in the Diocese of Pittsburgh are to develop a respect for the sacredness of all life, the pursuit of peace and order in the world, and an awareness of the responsibility to be co-creators of life-giving designs and protectors of the environment.

The science curriculum focuses on an inquiry-based process and fosters collaborative learning. Science education strengthens life skills, such as creative problem solving, critical thinking, team cooperation, use of technology, and the value of life-long learning.

World Languages

Because the Church is universal and embraces all people, regardless of race, nationality and financial status, the Catholic school encourages the study of world languages and other cultures. World language students learn the sounds and syntax of the language and work toward proficiency in listening, speaking, reading and writing. A variety of materials and methods are used for instruction. St. John the Baptist School offers Spanish in grades K-8.

Physical Education & Health

Physical education is a vital component of the curriculum, which assists students in identifying their physical strengths and weaknesses and encourages them to build on their strengths to achieve personal goals. Students learn to follow rules and to respect the rights of others through games and physical activity. Learning to channel energies constructively helps students perform successfully in life.

The Health for Success curriculum presents information at each level of development to help students make wise, moral decisions with respect for the God given Gift of life. The health curriculum places holistic emphasis on wellness, fitness, behaviors, and skills for healthy, active living. Education and health for children are inextricably intertwined. Students then have the benefit of sustained learning for reducing health-risk behaviors and enhancing health--promoting behaviors.

Fine Arts

In the Fine Arts program, students have the opportunity to deepen their awareness of God's gift of creation and to respond creatively to the beauty and goodness of the world through music, art and drama. Instruction in the Arts contributes to the development of the whole person, promotes individual expression, allows experimentation with diverse materials and elements, enables exploration and appreciation of the works of other students and major artists and musicians, develops an awareness and sensitivity toward the environment, and finally promotes a deeper understanding of heritage and culture.

The Fine Arts curriculum provides a holistic approach to education that incorporates many aspects of the core curriculum and can be integrated into the total educational experience.

Library

The school library exists primarily to support and enrich the curriculum. It is a service and teaching agency as well as a place of purposeful learning where the use of all resources correlate with the school curriculum to intensify and individualize a child's educational experiences. The Library is an integrated part of the total curriculum and is an essential element in the development of lifelong learning skills for students.

Technology

Technology instruction is essential in today's educational process. This instruction includes computer awareness and computer literacy. When this instruction and awareness are mastered, the computer becomes a basic tool for teaching logical thinking and problem-solving, creative writing, communication, the handling of information, and many other aspects of the curriculum.

Teachers of computer literacy look beyond hardware and develop an awareness of values such as relationships, collaboration, ethical conduct, responsibility and creative expression. As in all other areas of the curriculum, the integration of the Gospel values is a part of the teaching/learning process in the computer lab and classroom.

Students in 7th and 8th Grade are loaned a Chrome Book for use during the school year. Each student must provide damage insurance to cover any damage to the computer. The sole purpose of the Chrome Book is for the student to learn responsible computer use and to have access to blended learning activities in and out of school.
