Bishop of Milan, orator, liturgist, defender of the faith against Arianism, spiritual father of St. Augustine.

All notices which are to appear in the bulletin should be in the office by Thursday evening.

For the Record.

At present, we are working on a plan/or plans to strengthen the church roof enough so that the rods can be taken out of the church. I presented the plan to Mr. Mitner. He felt that the plan of bracing should work, but suggested that the plan be given to an architect to determine the strength of materials to be used. In accordance with this suggestion, the blue print of the church was given to Mr. John Flad.

Mr. Flad is the architect who drew the plans for Christ the King Chapel at Loras College, Holy Cross School, the new Orphanage, St. Edwards Church, Waterloo, etc.

We are supposed to hear Wednesday or Thursday of this week what can be done.

The reason for the extra precaution -- we want to make certain that after spending the extra money and labor now that we will have the ceiling torn loose, that we will do the best that can be done.
