

JPG SUMMER MATH INSTITUTE

JULY 15 - 26, 2019

JPG will be offering a summer enrichment program for students who

Who: Any JPG student entering 7th grade thru 10th

When: The two last full weeks of July. 8am - 11am

Where: The JPG campus

Why: To help develop competency with Integers and Rational Numbers.

To help students who are transferring to JPG understand the JPG approach to mathematics.

To assist existing students who struggle with mathematical thinking and reasoning.

To help students develop and strengthen mathematical thinking and reasoning skills.

To provide a practical framework for thinking about quantity and ratios through the study of integers and rational numbers.

To cultivate a joy of mathematics.

What will be covered?

We will be exploring number relationships through puzzles, patterns, interesting questions, games, readings, and communicating clearly using the language of mathematics. Specifically students will develop clear ways to think about integers, fractions, expressions, equations, and properties of real numbers.

What are the costs of the program?

\$120

Who will be teaching?

Mr. Ryan Gray and Mr. Craig Baker
