

FACILITIES UPDATE

Parish Pastoral Council Meeting: May 10, 2016

Building Committee

Glenn worked with Kathy Staskin to prepare a bulletin update that will appear in this week's bulletin.

We have the final version of the Engineering Contract, and it is ready for Fr. Gaudy's signature. The timeline construction dates reflect this.

The Design firm's work on the cooling tower and kitchen will follow once the Engineering contract is signed.

The Building Committee meets this Thursday to update the new schedule based on the Engineering Contract going into effect.

Other Facilities Issues

We have let a contract to perform numerous small electrical repairs both inside and outside the building to Interior emergency lighting, parking lot lights and the outlets used by the Fair behind the Cooling Tower.

The BBQ has been rebuilt through work donated by Tony Brennan, a mason in our parish. New grates are being purchased.

We have bought a new "Wide" Vacuum to replace our 14 year old vacuum that has deteriorated beyond repair.

We completed the annual PM to the Heating and cooling equipment throughout the building.

Two of our three grass cutters have been out due to illness, but we are struggling to keep up with it. We have called out grass cutting and gardening as ministries that need help for the upcoming ministry Fair.
