March 6, 2017

Dear fellow parishioners of Holy Trinity Parish:

Both Father Patrick and I thought it important to share with you a copy of Bishop Nickless' March 2 letter relating to our "Living our Faith, Building our Future" efforts here in Webster County. We thank you all for your energies and support of this major endeavor.

In accord with the Bishop's letter, the following steps will be undertaken without delay:

- BVH architects, who have assisted us with the master plan document and conceptual design of the new church, are being contacted to finalize plans that can be used for construction purposes.
- The architects will propose a timeline for this work, and will necessarily re-engage the parish's building design committee for further consultation.
- Also, the diocesan Building Commission will have to review the designs for final approval before any construction can begin.
- Additional plans and energies are being undertaken to improve the track and field at the St. Edmond Arena inasmuch as the existing track and field at St. Edmond will eventually be utilized for the new church building site.
- The "Living our Faith, Building our Future" continuation committee will continue to follow up on families who indicated they were yet 'prayerful considering' a gift to the capital campaign, which now stands at pledges in excess of \$8.1 million with \$4.4 million of that pledged now being held as cash on hand.

Once a more detailed timeline and plans are finalized, we will publish the same in the Sunday bulletin and on the parish website: www.holytrinitywci.org.

Once again, Father Patrick and I thank you for your faithful support of our parish family and our many efforts to provide for the ongoing evangelization of and spiritual care for the Catholic faithful in Webster County. May God bless you greatly!

May Jesus Christ be praised!

Sincerely yours in Christ,

Msgr. Kevin C. McCoy, STD, VG
