

Science Fair Contract

Rules Students Need to Keep in Mind

1. Most work for this will be done outside of school.
2. Students should do this by themselves. Parental help should be minimal.
*I understand that you are not expert scientists. The reason for this project is to have fun and learn something you did not know before. When you have someone else do most of the work, you do not learn as much. Your project does not have to be perfect. It just needs to follow the scientific method and look neat.
3. Your project must not hurt or scare yourself or others.
*You may not use any dangerous materials, unless it is absolutely necessary, and you have permission from your teacher and parent(s).

Unless you have a legitimate excuse, you are required to attend the Science Fair. If you cannot attend, you must have a written excuse before the fair. If you are sick the day of the fair, bring an excuse when you return to school.

When you attend the Science Fair, you should look neat and keep the following in mind.

*Am I dressed neatly? (No sweatpants or holes in pants or shirts)

*Am I showing enthusiasm and interest in my project?

*Can I answer questions, if anybody has some?

Important Due Dates

1. Science Contract _____
2. Topic _____
3. Research Paper _____
4. Project/Display Board _____
5. Class Presentations _____
6. Science Fair _____

Student Section

I _____, fully understand the rules and the due dates.

Parent Section

I _____, fully understand the rules and the due dates.

Student signature _____ Parent signature _____
