

Science Project Idea

Please fill out the bottom portion of this. Do it neatly. I need to be able to read it. You can refer to the example below.

Experiment Question: Will water with iodized salt boil faster than water with non-iodized salt?

Materials Needed: water, iodized salt, non-iodized salt, pan, measuring cup, measuring spoon, stopwatch, and a stove.

Experiment Question: _____

Materials: (You need to be specific on the materials you will need.)

Needed: _____

My child has permission to perform this experiment and use the materials necessary for it.

**Parent
Signature** _____

***Please keep in mind that if I feel that materials are too dangerous, I can tell you to change your experiment.**
