

# THE CODING CLUB @ MQHR 2019 - 2020

---

## What is the Coding Club?

The Coding Club is a unique opportunity for ALL MQ students to learn the computer science skills necessary to build their own website or create a computer game!

---

## Why should children learn to code?

By championing the step-by-step curriculum designed by companies like code.org, we can guarantee your child will understand the fundamentals of computer programming AND learn just what an amazing creative outlet coding can be. Just over 77% of all jobs, in the U.S., require the use of computer technology. Countless industries, namely agricultural, are completely reinventing how they conduct business, all because of the drastic demand for the high-speeds promised by computing power. Furthermore, the fundamentals develop skills which are translatable to programs like STLP and can help improve classroom grades.

---

## How do I sign up?

To sign up or ask questions, email me at [mike.meadors@maryqueenschool.org](mailto:mike.meadors@maryqueenschool.org). This club is being offered for \$30 per student, FOR THE WHOLE YEAR! We will meet afterschool on Thursdays from 3:30 to 4:45. All of the games and websites our students create will be displayed at the MQ Art Show in April. I look forward to hearing from you!

Mike Meadors  
Coding Club Facilitator
