

MEET THE TEACHER

Valerie Webre Kindergarten Teacher

Valerie is coming to OLPH with 18 years of classroom experience, most recently teaching kindergarten at C.T. Janet Elementary School in Marrero.

She and her husband have one three-year-old son who will also be joining our Hornet family. Her approach to teaching is project and center based. Her classroom contains a level of excitement that fully engages all students.

She has experience developing grade level curriculum, integrating technology, and working with a team of teachers to meet standards. Her resume includes teaching first and second grade, as well. Therefore, she will be integral in our alignment process across multiple grade levels as outlined in our accreditation goals. However, her primary goal is to help each child meet their full potential as an individual as they prepare for first grade. She is also looking forward to working with an additional certified teacher in her classroom, as she has taught kinder solo for the past few years.
