Dear Families,

        Summer math practice provides an opportunity for your child to practice and refine the skills learned this school year during the summer. **Based on feedback received from last summer's program, we will be utilizing MobyMax, a free online learning tool with individualized lessons and feedback.** This program is optimal for tracking and feedback tools for parents (with a parent login feature) and teachers. Attached you will find detailed instructions for how your student can login to their MobyMax account and the expectations for completed lessons.

        All students are expected to complete the work, individually, to the best of their ability. This is not a group assignment. Notes, Interactive Math Notebooks, websites, and past resources may be used. A calculator should only be used when provided to the student by the program. You should ensure that your child does not procrastinate, but rather plans the gradual completion of the program during the summer. Students have already been enrolled into my class online and we will be able to track their progress throughout the summer, as well as see how many skills/concepts are completed. Students will be graded based on completion of total number of concepts/skills as assigned in the attached document.

        At the beginning of the year, students will participate in "Beginning of the Year" Assessments to assess the students' abilities—which can affect their math level placement. These assessments will be based off the summer math program. If the student does not attempt the summer math program, this will be reflected in their beginning of the year assessments and will hinder their growth. They will be behind their peers and have struggles when learning new skills.

        If you have any questions, please email me at jennie.kim@spsjax.org.
Have a great summer!

        Ms. Kim, Middle School Math

Student Login to MobyMax

1. Using an internet browser, visit www.mobymax.com
2. Click "Sign In" in top right corner
3. Click "Sign in as a Student"
4. Use school code: **FL5748**
5. Login with the following:
   a. **Username:** firstname.lastname
   b. **Password:** abc123
6. Click on the bookshelf icon.
7. Select "Math" to gain access to the summer math lessons

Parent Login to MobyMax

1. Using an internet browser, visit www.mobymax.com
2. Click "Sign In" in top right corner
3. Click "Sign in as a Parent"
4. Use same login information as student
5. First page gives overview of student's progress and work in MobyMax
6. Select "Math" to gain more detailed reporting on student's math work

MobyMax Lesson Requirements:

Students have been assigned lessons based on their MobyMax placement assessment, taken at the end of May 2018. All students will be assigned lessons they failed on their placement assessment.

The number of lessons required **for all levels of math** are dependent on how the student performed on their placement assessment, taken before the school year's end.
